- ✓ **Perfect for Brushed or Polished surfaces**
- ✓ **Non-Abrasive**
- ✓ **No Scrubbing needed**
- ✓ **Ready-to-Use product.**
- ✓ **No dilution needed**

Nu-Stainless

Nu-Stainless can bring back to life even the most difficult Stainless Steel surfaces. Nu-Stainless removes rust, water scale, fingerprints, and stains of all types to make your stainless steel equipment and appliances look just like the day they were installed. Slightly thickened to cling to vertical surfaces yet thin enough to spray through almost any applicator, Nu-Stainless is non-abrasive and will not scratch or discolor stainless steel surfaces when used as directed.

You'll never need or want another product.

Directions: Nu-Stainless does not require dilution. Simply pour the product into a suitable dispensing device such as a trigger sprayer or pump-up sprayer* and apply a thin coat to the stainless steel surface. For small areas Nu-Stainless may be poured onto a non-abrasive, absorbent cloth and then rubbed into the surface. Be sure to wear suitable gloves when applying.

Allow the Nu-Stainless a short time to penetrate and loosen the stains and soils then rinse with large volumes of water or wipe clean with a wet towel. Best results will be seen by wiping clean. Difficult areas may require a second application.

*Caution! Nu-Stainless is acidic. All wetted parts of application equipment should be acid resistant. Be certain that the surface to be cleaned is Stainless Steel. Nu-Stainless may discolor other metals. Test in an inconspicuous location if in doubt.

Caution: Nu Stainless contains Acidic Fluorides. Take precautions to shield the skin and eyes from contact with the cleaning solution. Please refer to the MSDS for further precautions. Keep this and all similar materials out of the reach of children.
