

# Auto Scrub

## Concentrate

**Auto Scrub** is specifically designed for use in automatic floor scrubbing equipment or for simple damp mopping applications. Auto Scrub is the industry standard for cleaning floors of all types. Asphalt tile, terrazzo, marble, ceramic tile, concrete—sealed & painted or just bare concrete—any type of floor imaginable will come completely clean with Auto Scrub. Quickly lift and suspend soils of all kinds with a minimum of effort and cost. Auto Scrub will remove grease, grime, grit, and grunge safely and completely without rinsing and without foaming. Economical, biodegradable, and concentrated—for most applications just one to two ounces per gallon is all that is required for superior results.

**Directions:** Dilute the concentrated material with 60 to 100 parts of water. Simply calculate the volume of the scrubber tank in gallons and then add one ounce to two ounces for each gallon of working solution. For example, a 10 gallon Solution tank would require ten to twenty ounces of Auto Scrub. Some situations may require stronger solutions. Take care not to exceed fifteen ounces per gallon as foaming may result.

Be sure the soap solution has been well mixed in the work tank. In most cases, the soap should be added prior to the water addition. Simply run the floor scrubbing equipment according to the manufacturers directions. No rinsing should be necessary for most applications.

**Caution:** Auto Scrub may cause drying of the skin with prolonged contact and is irritating to the eyes.. Take precautions to shield the skin and eyes from contact with the cleaning solution. Please refer to the MSDS for further precautions. Keep this and all similar materials out of the reach of children.
