

Grease Buster Plus

- ✓ **Easy Hydrofoamer Application**
- ✓ **Versatile product for a multitude of cleaning needs**
- ✓ **Excellent wetting of oily surfaces**
- ✓ **Easily lifts oily and greasy soils from any surface**
- ✓ **Rinses easily and cleanly to a spot-free surface**
- ✓ **Safe for almost any surface yet strong enough to get the job done**
- ✓ **Highly concentrated for economy**
- ✓ **Leaves kitchens looking like new**

Grease Buster Plus

Grease Buster Plus has been designed with the toughest jobs in mind and combines the newest available surfactant technology with the alkaline builders that have been used for decades for truly tough grease and dirt removal. Special water softeners and dispersants have been added to prevent scale build-up in hot pressure washer coils and pumps.

Restaurants, engine rebuilders, mechanics shops, warehouses, car & truck repair, tool & die shops—anyplace where grease and grime are a problem, Grease Buster Plus is the answer.

May be applied via **Hydrofoamer**, pressure washer, mopping, flooding, or spraying. To cover large areas in a hurry, we recommend **River City's Hydrofoamer**. Simply set the orifice for the proper dilution, attach a water hose and start foaming! For delicate surfaces, be sure to test Grease Buster Plus in an inconspicuous area before proceeding.

Directions: Grease Buster Plus can be used in almost any fashion, from mopping to spray-and-wipe, but care should be taken that concentrated solutions do not remain in contact with the skin for prolonged periods of time. The preferred method of application for large jobs is through a hot water pressure washer or a **Hydrofoamer**. Set the soap control knob on the pressure washer to dispense five to ten ounces per gallon or use the Hydrofoamer without a tip (1:10) or with a green tip (1:25)* and apply with broad sweeping strokes, paying special attention to heavily soiled areas. Allow the soap solution to sit in the surface as long as is practical, giving Grease Buster Plus the time it needs to penetrate and loosen deposits of grease, oil, and soot. Rinse thoroughly with the pressure washer or a water hose for a clean film-free surface.

Grease Buster Plus may be used as a stronger solution for especially difficult degreasing or for removal of soot and smoke stains. Simply dilute with six to eight parts of water and apply through a pump-up sprayer or other suitable device. Allow the product time to penetrate and disperse the grease and soot, then rinse with a pressure washer if available.

Caution: Grease Buster Plus may irritate the skin and eyes. Take precautions to shield the skin and eyes from contact with the cleaning solution. Please refer to the MSDS for further precautions. Keep this and all similar materials out of the reach of children.
