

## Stain Away

**S**tain Away from River City Soap **contains no bleach** and no dilution is required. This ready-to-use spot and stain remover combines state of the art dispersants and decolorizers. Most stains will simply disappear as you watch. Use Stain Away for safe and complete removal of difficult stains such as iodine, blood, food and drinks, chocolate and many more from any and all fabrics and carpets. Don't throw away good clothing because of a simple stain! Use Stain Away.

### **Directions:**

**For Clothing:** Simply soak the affected area with Stain Away, work in with a brush, and allow 10 to 15 minutes for the product to work before washing the fabric according to the manufacturers directions.

**For Carpet:** Thoroughly saturate the area of the stain with Stain Away and work into the surface with a broom or soft bristle brush. Allow the Stain Away to work on the stain for at least ten minutes—longer contact times may be helpful for difficult stains. Clean the surface with a carpet shampoo machine or hot water extractor.

**For Upholstery:** Saturate the area of the stain with Stain Away and work into the surface with a clean rag or a soft brush. Allow the Stain Away to work on the stain for at least ten minutes. Blot the area with a wet towel and then vacuum the treated area to dry the upholstery as much as possible

Keep the container tightly sealed when not in use to prolong the activity of unused solutions. Stain Away contains no bleach and yet it is effective against some of the most difficult stains. However, no spot or stain remover can safely remove all stains from all fabrics. **Test an inconspicuous area before proceeding.** In rare cases Stain Away may cause color fading.

Although Stain Away is not particularly toxic, it may cause some drying of the skin and will cause significant irritation of the eyes and mucous membranes. Use of normal industrial hygiene is recommended. Please refer to the MSDS for more specific precautions.

**Keep this and all similar materials out of the reach of children.
